POWER PLATFORM & SHAREPOINT SOLUTIONS ARCHITECT | DATA SCIENTIST

PROFESSIONAL SUMMARY

Power Platform & SharePoint Solutions Architect with 2+ years designing and delivering enterprise Microsoft solutions across SPFx, PCF, Dataverse, Power Apps, Power Automate, Power Pages, and Power BI. Proven track record leading solution design and technical delivery for enterprise clients (Associated British Foods, St. James's Place), building custom SPFx web parts and PCF components, modeling data in Dataverse, and automating business processes with Power Automate. Skilled in JavaScript, TypeScript, and REST/Graph API integrations across the Microsoft 365 and Power Platform ecosystem. Complemented by a strong data science and AI/ML foundation (Python, SQL, TensorFlow, Scikit-learn) that supports data-driven architecture decisions and advanced analytics within enterprise digital transformation initiatives. Based in Saudi Arabia, aligned with Vision 2030 digital transformation priorities.

TECHNICAL SKILLS

- **Power Platform & SharePoint:** SPFx (SharePoint Framework), PCF (PowerApps Component Framework), Power Apps (Canvas & Model-Driven), Power Automate, Power Pages, Dataverse, Power BI, Microsoft Fabric
- **Development:** JavaScript, TypeScript, React.js, REST & Graph APIs, HTML/CSS, C++ / Embedded C
- **Data & AI:** Python (NumPy, Pandas, Scikit-learn), TensorFlow, PyTorch, SQL/MySQL, NLP, Computer Vision (OpenCV, YOLOv8)
- **Tools & Platforms:** Dataverse security modeling, DAX, ETL/ELT, Tableau, Git/GitHub, Flask/FastAPI

PROFESSIONAL EXPERIENCE

Embedded Systems & Avionics Engineer — **Jun 2026 – Present**
Beta Industrial — *Saudi Arabia*

- Design, build, and configure UAV/drone flight systems in the Electronic, working across Arduino, ESP32, STM32, Pixhawk 6C Mini, and Orange Cube flight controllers.
- Configure and tune flight parameters using Betaflight and Mission Planner for multirotor and VTOL (Vertical Take-Off and Landing) aircraft.
- Apply embedded systems and hardware-software integration skills that transfer directly to enterprise system architecture, integration testing, and technical troubleshooting.

Data Scientist / Power Platform Developer — **Nov 2024 – Mar 2026**
Numrex — *Lahore, Pakistan*

- Delivered a Business Performance Dashboard in Power BI for Associated British Foods (ABF), visualizing sales, supply chain efficiency, production, and retail performance across five divisions, providing real-time insight into profitability and regional performance.
- Built a secure HR Power App for St. James's Place (Power Apps & Power Automate), including the data model, Note Taker and HR screens, and onboarding automation flows with role-based security.
- Designed a Power BI timesheet dashboard with custom DAX measures across yearly, half-yearly, quarterly, and custom periods, improving operational efficiency by 30%.
- Built and customized CRM application forms using Power Apps and Dataverse modeling with data validation rules, improving data entry quality.
- Developed multiple custom SPFx web parts for client-specific SharePoint solutions, achieving 100% client satisfaction, and automated document library expiry tracking with Power Automate.
- Gained hands-on experience with Microsoft Fabric for integrated analytics, data modeling, and BI reporting across data engineering and analytics teams.

Power Platform and SharePoint Developer — **Nov 2024 – Dec 2025**
KeaPoint (UK) — *Hybrid*

- Contributed to enterprise SharePoint modernization and Power Platform solution delivery for UK-based clients, building custom SPFx components and Power Apps solutions.
- Collaborated on Power Automate workflow design and Dataverse data modeling to support business process automation across hybrid teams.

Model Training (Content Analyst) — **May 2025 – Jul 2025**
Turing (Meta) — *Remote*

- Performed detailed video annotation, segmentation, and multimodal captioning across 120+ clips to support ML model training, improving model accuracy by 15% and cutting labeling time by 20%.

Power BI Dashboard Developer **Jul 2024 – Oct 2024**
Activision *Bahawalpur, Pakistan*

- Analyzed international gaming and Superstore datasets in Power BI to uncover trends, optimize performance metrics, and streamline financial reporting workflows, reducing reporting time by 30%.

Data Science Intern **Jun 2023 – Aug 2023**
CodSoft *Remote*

- Enhanced data processing speed by 30% through optimization techniques; collaborated on 4 machine learning projects using Python and R.

KEY PROJECTS

- **AI CV & ATS Score Analyzer:** Python, Flask, NLP, pdfplumber. Extracted 100+ skills from CVs, matched against job descriptions, returned ATS compatibility scores; deployed live for the Saudi job market.
- **Bilingual AI Chatbot (AR/EN) for Saudi Market:** Python, Flask, LangChain, Groq API, LLAMA 3.3-70B. RAG-based chatbot with full RTL Arabic UI and voice input, deployed live for retail/logistics use cases.
- **ZATCA-Compliant VAT Invoice Generator:** Python, Flask, ReportLab, TLV encoding. Generated ZATCA Phase 1 compliant invoices with QR codes and Arabic/English toggle in under 10 seconds.
- **Security System for Bike Entry:** YOLOv8, OpenCV, Random Forest/SVM. Computer vision system for automated entry detection with 91% accuracy.

EDUCATION

BSc Computer Systems Engineering — CGPA 3.57 **Oct 2020 – Jun 2024**
The Islamia University of Bahawalpur

FSc (Pre-Engineering) — 77.81% **Sep 2018 – Jun 2020**
Global Degree College, Peshawar

CERTIFICATIONS

- Google Data Analytics Case Study (Coursera)
- Supervised Machine Learning: Regression and Classification
- Unsupervised Learning, Recommenders, Reinforcement Learning
- AI Certification (10-month course)
- Introduction to Cybersecurity Tools & Cyberattacks
